**DETAILED ACTION**

***Response to Amendment***

1. The Amendment filed on 08/17/2009 has been received and made of record. Claims 1, 9, 17, and 25 have been amended. Claims 1-4, 6-11, 13-15, and 17-40 are pending in the application.

***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance:

As to independent claim 1, the prior art does not teach or fairly suggest a method for differentiating between foreground objects and background objects within a scene being captured through an image capture device, comprising: adjusting an image capture device parameter according to bit values of the depth mask for one or more of a sequence of captured image frames of the scene, wherein the image capture device parameter is selected from one of brightness, exposure or gain; and applying the adjusted image capture device parameter so that the brightness, exposure, or gain of the captured image frames is adjustable independently for both of the objects within the foreground region and the objects within the background region; and tracking an object within the foreground region, the tracking being enhanced by the applied adjusted image capture device parameter, and in combination with other elements.

As to independent claim 9, the prior art does not teach or fairly suggest a method for adjusting image capture settings for an image capture device, comprising: adjusting pixel values of the data defining the image corresponding to objects within any one or both of a foreground region and a background region of the captured image, wherein the adjusting of pixel values is according to bit values of the depth mask, wherein the adjusting pixel values causes a change in brightness such that both of the pixel values associated with the foreground region and pixel values associated with the background region are adjustable independently for brightness; and tracking an object within the foreground region, the tracking being enhanced by the adjusting of pixel values, and in combination with other elements.

As to independent claim 17, the prior art does not teach or fairly suggest an image capture device configured to provide an image of a scene, comprising: image capture logic configured to adjust an image capture device setting for a characteristic associated with the image based upon a corresponding bit value of the depth mask, wherein the bit value determines whether the respective pixel is associated with one of the foreground objects and the background objects, and the image capture logic is configured to apply the adjusted image capture device setting so that the pixels of the image associated with both of the foreground objects and the background objects are adjustable independently for the characteristic, and wherein the characteristic is selected from a group consisting of exposure, gain, and brightness; and tracking logic configured to track an object within the foreground region, the tracking being enhanced by the applied adjusted image capture device setting, and in combination with other elements.

As to independent claim 25, the prior art does not teach or fairly suggest a system comprising an image capture logic configured to apply the adjusted image capture device setting so that each pixel of the image is adjustable independently of another pixel for the characteristic, whether associated with the foreground objects or the background objects, and wherein the characteristic is selected from the group consisting of exposure, gain, and brightness; and a tracking logic configured to track an object within the foreground region, the tracking being enhanced by the applied adjusted image capture device setting, and in combination with other elements.

As to claims 2-4, 6-8, 10-15, 18-24, and 26-40, these claims are dependent upon allowable independent claim 1, 9, 17, and 25, respectively, and are thus also considered allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
